

LOUISE DRULHE

Author of the Critical Atlas of the Internet, Louise Drulhe (1990) works on picturing the shape of the Internet. Graduated from Ensad in Paris (École Nationale Supérieure des Arts Décoratifs), she develops a plastic and conceptual research on mapping the Internet and the blockchain. She believes that in order to understand online socio-political issues, we have to study the particular shape of the Internet. Louise Drulhe considers the spatialisation as a tool to understand the stakes involved. She develops her research on different medium from drawing to video making.
